Looking for challenging problems to solve and mentor others with the knowledge I have gathered to grow with & grow more.

## EXPERIENCE

2019, AUGUST 1 – PRESENT

**SOFTWARE DEVELOPER**, GOPAL MADISON

Bootstrapped the web application which allows users to create their own strategies with the help of available indicators and execute trades

Able to increase the accuracy of the trade by **71%** executed on a particular strategy, by implementing the **Kalman Filter** to extrapolate the price of the component.

Implemented a **back-testing framework** for allowing the users to test their strategies.

2018, JUNE 4 – 2019, JULY 20

**MEMBER OF TECHNICAL STAFF**, ZOH0 CORPORATION

Developed an **employee tracker application** according to their specific skill sets

Implemented **Data cache layer** at client side to **reduce maximum API calls with the help of REST Architecture**

Created **common components** in front-end supporting multiple browsers, which is still used in **ongoing products**

Worked as a **Full-stack developer** in a web-application, where my part resides in **managing the font end team** and developed features which allows the user to manage CVE's and actions performed on them.

## EDUCATION

MAY 2018

**B.E., MECHANICAL ENGINEERING**, PSVP ENGINEERING COLLEGE

7.6 CGPA

Developed an Android Application for EEE Classes to register to the events and see updates regarding that
